

C-LANT PORT: A REVOLUTIONARY LIFE SAVING SOLUTION FOR CHEST TRAUMA AND POST OPERATIVE DRAINAGE

OVERVIEW

The C-Lant Port is a revolutionary, sterile, single-use trocar designed to transform the insertion, fixation, and replacement of chest tubes and surgical instruments. It offers unmatched efficiency and safety for both hospital and pre-hospital settings, setting a new standard in chest trauma management and minimally invasive drainage procedures. Easy to use by any trained medical professional, the C-Lant Port ensures optimal patient outcomes.
